

Birding at the Springs

June 2017

Many bird sightings for the month of June! The indigo buntings and goldfinches are here for the summer, and can be seen regularly in the woods. A green heron has also decided to stick around for the last couple of weeks on one of the islands in the pond, a treat to see if you aren't familiar with this small heron. We hope you will visit in July and help us with our bird list in the Education Center!

1. American goldfinch
2. Blue jay
